Tosa firm wins \$38 million Navy contract

TN & Associates continues success in federal contracts

BY PETE MILLARD
pmillard@bizjournals.com

The largest woman-owned engineering firm in Wisconsin has signed a five-year, \$38 million contract with the U.S. Navy to provide environmental engineering services at four naval installations in Florida.

This is not the first time TN & Associates Inc., Wauwatosa, has written a winning proposal for the Navy. Last year, TN & Associates was awarded two federal contracts worth \$30 million over five years for completing environmental cleanups at the Naval Facilities Engineering Command, Southwest Division, San Diego.

"You have to go where the federal dollars are."

Terry Ni
TN & Associates

"Anytime a 190-person firm can garner a \$38 million contract, it speaks volumes about the quality of the work they put out," said Brian Swenson, a vice president of HNTB Corp., Milwaukee.

To demonstrate how big the \$38 million deal will be for TN & Associates,

Swenson said his firm worked for years to set up a partnership with CH2M Hill to win the \$30 million engineering contract for the Marquette Interchange project in downtown Milwaukee. HNTB has worked with TN & Associates on projects for the Wisconsin Department of Transportation and the Milwaukee

Metropolitan Sewerage District.

TN & Associates' Navy contracts are for environmental restoration projects at military bases where there are petroleum spills. The Wauwatosa firm also has completed environmental remediation projects
